

RAVI KUMAR

Machine Learning Engineer | Data Analyst

Tuticorin, Tamil Nadu 628005 | 7464059133 | Ravikumar755667@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Aspiring Machine Learning Engineer with a solid foundation in Data Science and predictive modeling. Seeking to leverage an academic background in AI & Data Science (CGPA: 7.8/10) and hands-on experience building machine learning pipelines, NLP applications, retrieval-augmented generation (RAG) systems, and responsive web solutions to contribute to innovative technical projects.

TECHNICAL SKILLS

- Languages & Frameworks:** Python, TensorFlow, Hugging Face, Scikit-learn, NumPy, Pandas, SQL, NLP, Django, HTML, CSS, JavaScript
- Generative AI:** Retrieval-Augmented Generation (RAG), LLM-powered chatbots, Vector Databases, Prompt Engineering, LangChain
- Deep Learning:** Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN)
- Data Visualization & BI:** Matplotlib, Power BI
- Tools & Platforms:** Git/GitHub, Docker, FastAPI, Linux (Command Line), Microsoft Excel
- Core Competencies:** Data Preprocessing, Algorithm Selection, Regression Analysis, Model Evaluation

EXPERIENCE

AI/ML Intern — Matt Engineering Solution

1 Month 3 Days

- Learned and applied core Machine Learning and AI concepts through hands-on practice during the internship.
- Worked with the Django backend framework to support ML-related application development and integration.

PROJECTS

Movie Recommendation System

- Engineered a personalized movie recommendation system using Python, processing large datasets to enhance suggestion relevance and system performance.

House Price Prediction Model

- Designed and implemented a regression-based predictive model for real estate price forecasting, employing advanced data preprocessing, normalization, and feature selection to improve model accuracy.

Language Detector

- Built a language detection web application with a Django backend, integrating NLP techniques to enable efficient, accurate identification of user-input text.

Tea Between — E-commerce Website

- Developed a fully functional e-commerce platform, "Tea Between," for food and beverage retail (hot tea, cold drinks, snacks) using HTML, CSS, JavaScript, and Django, delivering a seamless, responsive user experience.
- Built a machine learning-based product recommendation engine that analyzed user browsing and purchase behavior to suggest personalized tea and snack pairings, increasing customer engagement.
- Integrated a Retrieval-Augmented Generation (RAG) powered chatbot to handle customer queries, providing accurate, context-aware responses on menu items, orders, and offers by grounding LLM outputs in the store's product knowledge base.

CERTIFICATIONS

- AWS Machine Learning – Specialty (Training Completed) — January 2026
- YUVA AI for All — Ministry of Electronics and Information Technology (MeitY), Government of India — December 2025
- Microsoft Excel Certification: Advanced Data Management — January 2026

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence & Data Science

2023 – 2027 (Expected)

- Grace College of Engineering, Tamil Nadu — CGPA: 7.8/10 (up to 5th Semester)

Higher Secondary (Class XII) — BSEB

2022

- Percentage: 70%

Secondary (Class X) — BSEB

2020

- Percentage: 79.4%

PROFESSIONAL STRENGTHS

- Problem Solving** — Strong analytical thinking to resolve complex technical problems
- Communication** — Ability to explain technical concepts clearly and effectively
- Teamwork** — Collaborative mindset with the ability to work efficiently in team environments
