RAVI KUMAR

AI Developer

Tuticorin, Tamil Nadu 628005 | +91 7464059133 | Ravikumar755667@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence & Data Science with hands-on experience in deep learning, NLP, and generative AI. Built a TensorFlow CNN brain tumor classifier for MRI scans, a RAG-powered chatbot, and an ML recommendation engine, and integrated ML models into Django web apps. Seeking an entry-level AI Developer role to build practical AI solutions.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python, TensorFlow, Keras, Hugging Face, Scikit-learn, NumPy, Pandas, Matplotlib, SQL, NLP, Django
- **Deep Learning & Computer Vision:** Convolutional Neural Networks (CNN), Artificial Neural Networks (ANN), Image Classification, Medical Image Analysis, Data Augmentation
- **Generative AI:** Retrieval-Augmented Generation (RAG), LLM-powered chatbots, Vector Databases, Prompt Engineering, LangChain
- **Tools & Platforms:** Git/GitHub, Docker, FastAPI, Linux (Command Line)
- **Core Competencies:** Data Preprocessing, Algorithm Selection, Regression Analysis, Model Training & Evaluation
- **Languages Known:** English, Hindi, Tamil

PROJECTS

Brain Tumor Detection using CNN — TensorFlow / Keras

- Built and trained a Convolutional Neural Network in TensorFlow/Keras to classify brain MRI scans for tumor detection.
- Applied image preprocessing (resizing, normalization) and data augmentation to improve generalization, and evaluated the model using accuracy, precision, recall, and confusion matrix with Matplotlib visualizations.

Customer Churn Prediction — FastAPI

- Built an Artificial Neural Network (ANN) classification model in TensorFlow/Keras to predict customer churn from historical usage and account data, applying data preprocessing and feature engineering to improve prediction accuracy.
- Deployed the trained model as a REST API using FastAPI, enabling real-time churn-probability predictions for integration with other applications.

Language Detector

- Built a language detection web application using a Naive Bayes machine learning model with NLP-based text feature extraction, integrated with a Django backend for efficient, accurate identification of user-input text.

Tea Between — E-commerce Website

- Developed a fully functional e-commerce platform, “Tea Between,” for food and beverage retail (hot tea, cold drinks, snacks) using HTML, CSS, JavaScript, and Django, delivering a seamless, responsive user experience.
- Built a machine learning-based product recommendation engine that analyzed user browsing and purchase behavior to suggest personalized tea and snack pairings, increasing customer engagement.
- Integrated a Retrieval-Augmented Generation (RAG) powered chatbot to handle customer queries, providing accurate, context-aware responses on menu items, orders, and offers by grounding LLM outputs in the store’s product knowledge base.

EXPERIENCE

AI for Sustainability Virtual Intern — 1M1B, with IBM SkillsBuild *Jul – Sep 2026*

- Completed an AICTE-supported virtual internship gaining practical experience in AI, responsible AI use, and sustainability concepts aligned with the UN Sustainable Development Goals (SDGs).
- Applied Agentic AI and Retrieval-Augmented Generation (RAG) systems to solve real-world sustainability problems.

AI Developer Intern — Matt Engineering Solution *1 Month 3 Days*

- Learned and applied core Machine Learning and AI concepts through hands-on practice during the internship.
- Worked with the Django backend framework to support ML-related application development and integration.

CERTIFICATIONS

- AWS Machine Learning – Specialty (Training Completed) — January 2026
- YUVA AI for All — Ministry of Electronics and Information Technology (MeitY), Government of India — December 2025
- Data Science — Cisco Networking Academy — March 2026
- AI/ML — Udemy

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence & Data Science *2023 – 2027 (Expected)*

- Grace College of Engineering, Tamil Nadu — CGPA: 7.85/10 (up to 7th Semester)

Higher Secondary (Class XII) — BSEB *2022*

- Percentage: 70%

Secondary (Class X) — BSEB *2020*

- Percentage: 79.4%
